AIRSOFT GUN REVIEWS

USPSA Division – Singlestack/L10

Maker – KWA

Model – 1911 Mark III

Pistol weight – 35 oz with mag inserted

Frame – metal short dust cover

Slide – metal front and rear cocking serrations

Outer Barrel – plastic bull barrel

Sights – black serrated front white 2 dot rear fixed

Safeties – ambi

Grip – front strap checkered with magwell

Trigger weight – less than 2 pounds

Holster - not tested

Accuracy – 1 inch group (low), 5 shots at 15 feet from rest

Chrono – (Mag temp warm) (**BB weight .20**) 353fps, 369fps, 355fps, average 359 fps

Magazines – metal with plastic bumper base pad

Magazine feed lips – metal

Magazine filling – 14 plus bb's, can use bb loader without attachment

Ammunition – .20 or .25 gram bb's work great

Maintenance – wipe down regularly to remove any dust or build up. Inspect all rubber seals for wear on pistol and magazine. Lubricate with 100% use silicone oil (not petroleum based).

Break down – slide stop pin, guide rod and spring

Aftermarket parts – metal outer barrel

Pros – high quality, checkered front strap with magwell,

Cons – none found

Summary - This is a high quality airsoft that I think fits the bill for most singlestack shooters who also shoot L10 with there 1911's.
