AIRSOFT GUN REVIEWS

USPSA Division – Singlestack/L10

Maker – KWA

Model – 1911 Mark I

Pistol weight – 35 oz with mag inserted

Frame – metal short dust cover

Slide – metal front and rear cocking serrations

Outer Barrel – plastic bushing barrel

Sights – white dot front, white 2 dot rear fixed

Safeties – left thumb (not ambi)

Grip – front strap no checkering, no magwell

Trigger weight – less than 2 pounds

Holster - blade-tech IDPA

Accuracy – 1 ¼ inch group (low), 5 shots at 15 feet from rest

Chrono – (Mag temp warm) (**BB weight .20**) 382fps, 369fps, 361fps, average 370 fps

Magazines – metal with plastic bumper base pad

Magazine feed lips – metal

Magazine filling – 14 plus bb's, can use bb loader without attachment

Ammunition – .20 or .25 gram bb's work great

Maintenance – wipe down regularly to remove any dust or build up. Inspect all rubber seals for wear on pistol and magazine. Lubricate with 100% use silicone oil (not petroleum based).

Break down – slide stop pin, full length guide rod and spring. Need to remove bushing first.

Aftermarket parts – n/a

Pros – high quality, standard 1911 with some modern trimmings,

Cons – none found

Summary - This is a high quality airsoft that I think fits the bill for most classic singlestack shooters.
